Policy Document

Introduction to Value-added, certificate, and add-on course

It has been decided to implement Value-added and Certificate Courses beginning with the 2022–23 academic year in response to the changing needs of students and the ever-changing educational landscape. These classes are designed to give students more information and abilities outside of the required curriculum while also improving the academic flexibility of the teaching-learning process.

Objectives

1. Provide students with chances for overall growth by adding specialized knowledge and skills to their academic endeavors.
2. To provide a variety of courses in several fields to meet the varied interests and career goals of students.
3. To improve students' employability by providing them with credentials and real-world experience that align with industry standards.
4. To promote creativity and multidisciplinary education by providing classes that cross conventional disciplinary lines.
